GEOGRAPHY

The Maldives is a nation of islands in the Indian Ocean, that spans across the equator. The country is comprised of 1192 islands that stretch along a length of 871 kilometers. While the country covers an area of approximately 90,000 square kilometers, only 298 square kilometers of that is dry land. The islands are grouped into a double chain of 26 atolls.

The country's unique geography mesmerizes the visitor. Reefs that offer bands of color, tiny jewel-like islands rimmed with the whitest of soft sand surrounded by the clearest shallow waters that one can imagine. Only 200 of the islands are inhabited, and a select few on each of the atolls are resorts and some of the islands are used for industry and agriculture.

The beauty of the Maldives is not only above the water. The Maldives is home to about five percent of the planet's reefs that comes with an explosion of color contributed by soft and hard corals that form them. The reefs are home to a thousand species of fish. Lured by the rich nutrients that flow in with the currents, large pelagic fishes such as manta rays and whale sharks also make the Maldives their home.

Nika Island Resort & Spa 4*

Nika Island is a piece of Maldivian history, one of the first islands in Ari Atoll to become a unique destination in the world. Nika Island is the heavenly island of our collective imagination. A platform where the typical concepts of Maldivian

tradition and beauty blend with Italian culture. Nika is the island where nothing has changed. A place where you come to experience the Maldives of times past. "A thing of beauty is a joy forever," wrote the English poet Keats – the beauty of Nika transcends any description. This island is suspended in time, immune to the dynamics of massive tourism that are redefining the Maldives today. An ambitious alchemical experiment, unrepeatable and totally successful, that has written an important chapter in the history of tourism in the Maldives.
